# PROBLEM STATEMENT

In Library management system the data is secured and validate with the correct data information provided by the user.

If user provided incorrect data it gives the error message I.e, invalid credentials.

# SHORT DESCRIPTION

In Library Management System we designed the project with 3 pages

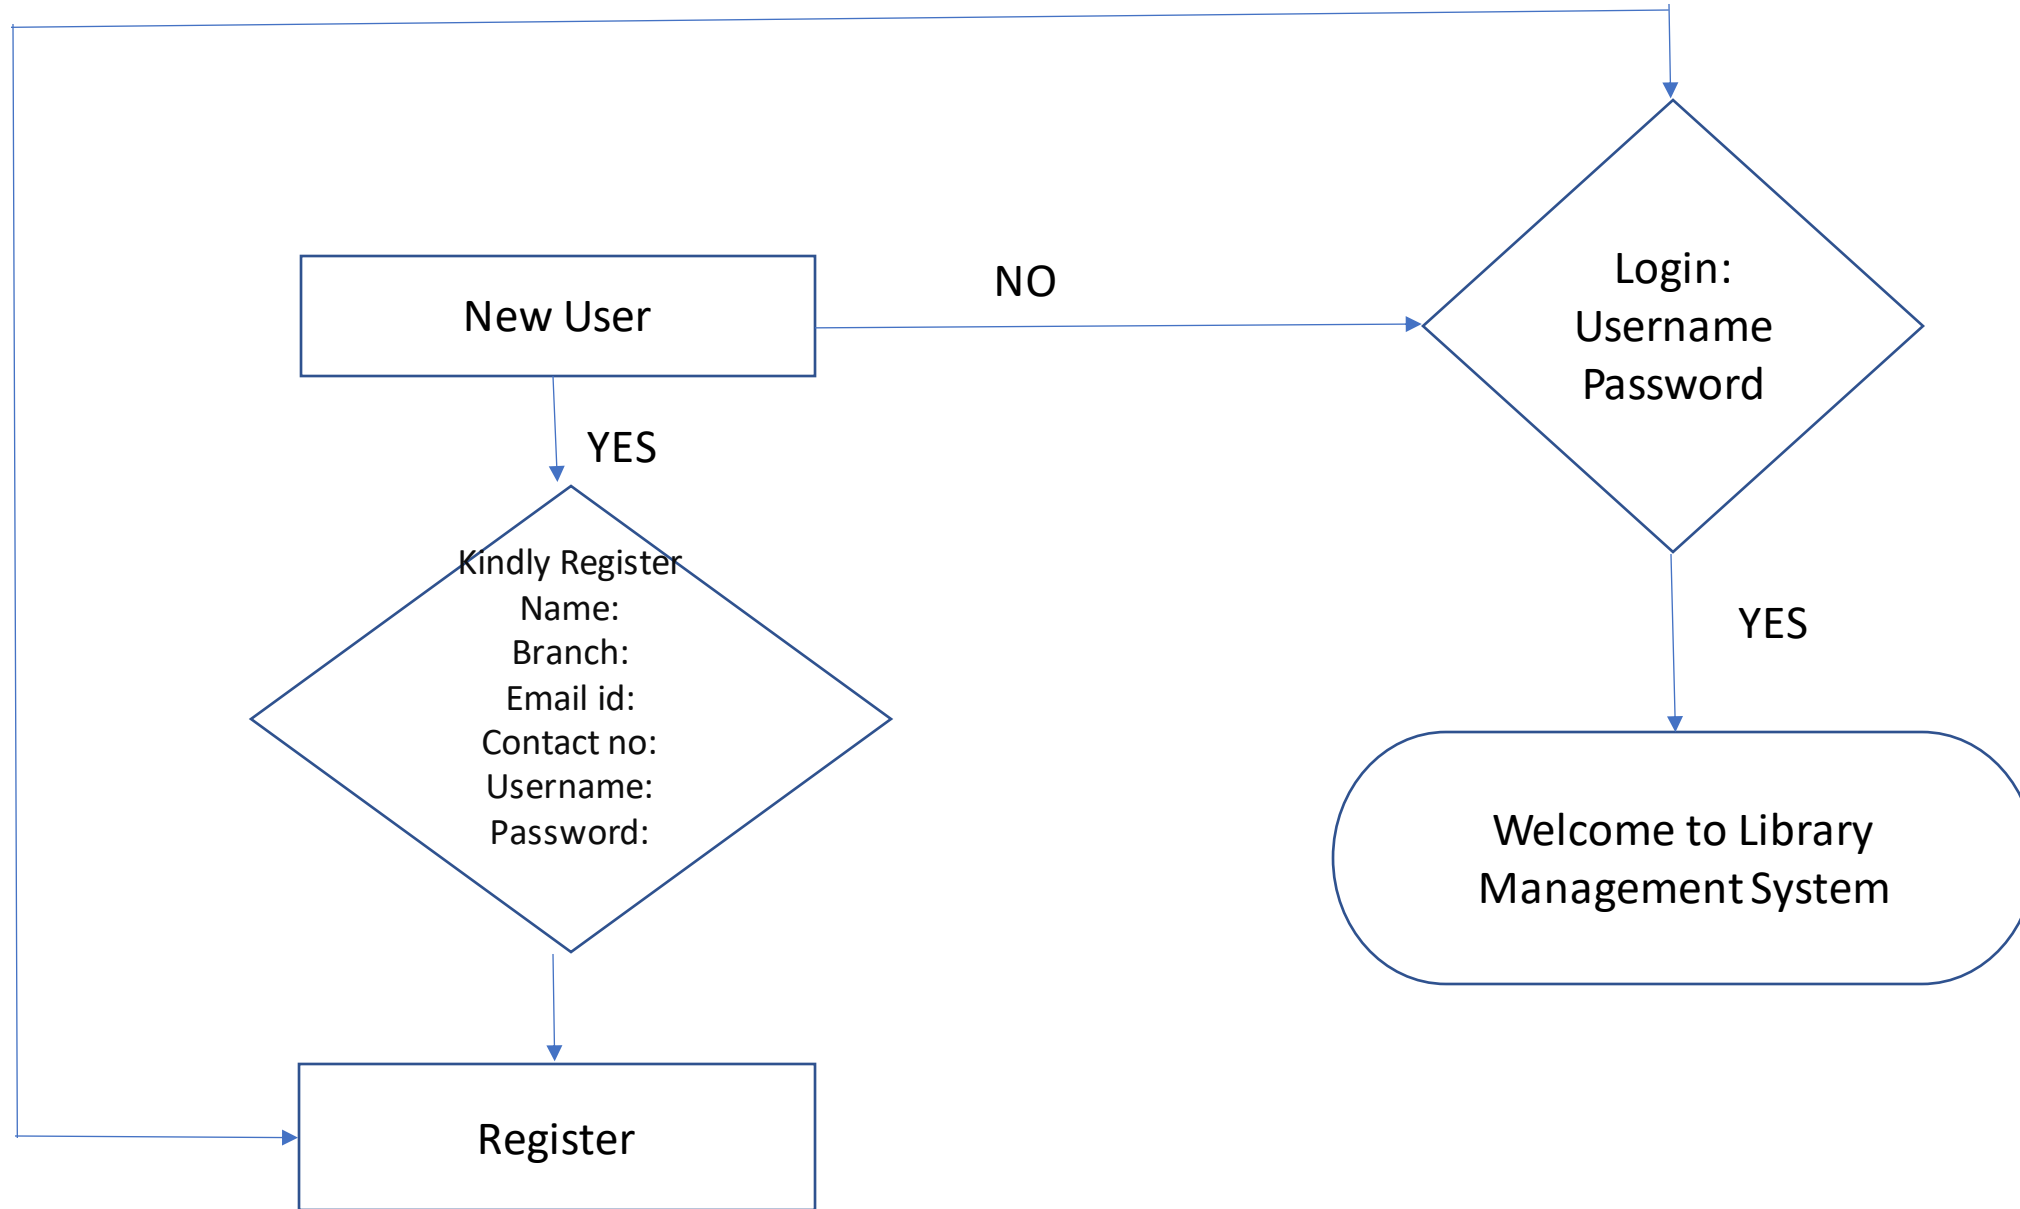

1. Login page
2. Registration page
3. Home page

Login page used by the user to login into system. They are required to enter user id and password before they are allowed to enter the system. The user id and password will be verified and if invalid id is there user is allowed to not enter the system.

In registration page where user should give the information i.e, Name, Branch, Email id, Contact number, Username and Password.

Home page will be directed after entering correct Username and Password.

# ARCHITECTURE

# TECHNOLOGIES

The technologies used our project

- Frontend:

HTML, CSS, Javascript

- Backend:

Spring, Java,MySQL

# TOOLS

The tools used in our project

- Springtoolsuite
- MySQL Workbench

# RESULTS

**THANK YOU**
